EDUCATION

North Carolina A & T State University
B.S., Information Technology GPA: 3.61

Greensboro, NC
May 2026

PROJECTS

Alignn– Wellness Platform (Independent Product)

Aug 2025-Present

HTML | CSS | JavaScript | Node.js | Express | PostgreSQL

- Architected and deployed a full-stack wellness platform using Node.js, Express, and PostgreSQL, designing a normalized relational schema spanning 13 tables, 94 columns, and 7 foreign-key relationships to support authentication, mood tracking, journaling, and check-ins.
- Led a user-feedback driven redesign of the application's visual system, moving from individualized page backgrounds to a unified light-blue interface after feedback revealed the original design felt emotionally overwhelming rather than calming.
- Integrated a rate-limited AI wellness assistant (Beta, 5 messages/user/daily) delivering context-aware support across mood, journaling, and workout flows; implemented JWT-protected authentication via Supabase Auth.
- Built and populated content-driven wellness modules – including 120+ workout exercises across 18 difficulty tiers and 27 structured nutrition resources – and deployed to production on Vercel.

Traffic Sign Detection System

Spring 2026

Group Research Project | YOLOv11, Machine Learning – NC A&T Dept. of Computer Systems Technology

- Collaborated within a team to develop a YOLOv11 object detection pipeline trained on a hybrid dataset of synthetic (GTA V) and real-world traffic images to improve robustness across driving conditions.
- Personally contributed dataset preprocessing, image augmentation, and label-formatting scripts, and evaluated detection performance using mean Average Precision (mAP) across lighting, weather, occlusion, and distance conditions.

UniFit — Fitness Tracking App

Spring 2024

Group Project | SQL, | Relational Database Design

- Modeled the architecture of a fitness-tracking application covering workout tracking, nutrition logging, and biometric data management to improve feature organization and scalability.
- Collaborated within an agile team, personally contributing the normalized relational SQL schema – defining entities, relationships, and constraints – alongside backend planning support.

WORK & LEADERSHIP EXPERIENCE

NC Fusion & NCHSAA

Greensboro, NC

Soccer Official

Aug 2019- Present

- Officiated 50+ competitive soccer matches per season by making real-time decisions under pressure, ensuring player safety and consistent enforcement of league regulations.
- Earned the 2025 Young Referee of the Year award through professionalism, consistency, and leadership across regional youth competitions.
- Resolved high-pressure conflicts among players, coaches, and spectators through clear communication and decisive problem-solving, maintaining safe and controlled match environments.

Thomas Built Buses

High Point, NC

Help Assembly Technician

May 22- June 21, 2024

- Executed precision mechanical assemblies following engineering drawings and manufacturing specifications, ensuring consistent quality and safety compliance.
- Collaborated with production teams across multiple assembly operations to resolve issues and maintain workflow efficiency in a high-volume manufacturing environment.

CERTIFICATIONS

- Cisco Networking Academy (Nov 2024): Networking Basics, Networking Addressing & Basics, Network Support and Security

TECHNICAL SKILLS

HTML | CSS | JavaScript | Python | SQL | Git | GitHub | VS Code | Wireframing | User Flows | User Research | Usability Testing

ACCOMPLISHMENTS/ACHIEVEMENTS

Dean's List (5X) | Chancellor's List (2X) | African Aggies Coalition (AAC) 2022-2026 | Women in Science and Technology (WiST) 2024-2025 | Honors: Alpha Lambda Delta – 2023
